ISO/IEC 27001 Certificate Register Extract

Record AVL-ISMS-27001-2026-0711 | Recorded 11 July 2026 | Acme Logistics

This page is a certificate-register extract held by Procurement & Vendor Risk. It records a certificate on the supplier file. It is not an accreditation, and it does not certify the Customer or any product.

1. Registered organization

Legal name on the vendor register

Acme Logistics (vendor-02).

Contact

contracts@acme.example.com

Region and country

AMER / Singapore

Category

Category 02 Tooling / Indirect Materials

Years active and status

13 years. Status: In Review.

2. Certificate record

Record number

AVL-ISMS-27001-2026-0711

Standard

ISO/IEC 27001:2022, Information security management systems.

Recorded on the file

11 July 2026

Scope recorded

Information security management for logistics and tooling services supplied as indirect materials under Category 02 Tooling, operated for AMER demand from Singapore. The scope does not cover product design for components, and it does not extend to subcontractors unless they are named on the certificate schedule held with the original.

3. How the portal uses this record

Reviewers use the record as evidence that an ISMS certificate was presented at onboarding. They still score the supplier from the register. Annual spend baseline: USD 4,673,723. On-time delivery: 83.6 percent. Scorecard: composite 73 (Watch; Low starts at 75), financial 61, compliance 70, delivery 76, cyber 65. A higher score is better.

4. Conditions

The original certificate, including any statement of applicability, stays with the supplier file. If the certificate expires inside the portal 60-day window, the reviewer logs a renewal task before Compliance Review can close. A change of legal name, scope, or operating country requires a new extract. This PDF does not replace the

certification body document and does not name a certification body, because the portal stores the supplier record rather than acting as an accreditation authority.

5. Statement

Procurement & Vendor Risk records that Acme Logistics presented ISO/IEC 27001:2022 evidence for the scope above, under record AVL-ISMS-27001-2026-0711, on 11 July 2026. Approval of the supplier remains a separate onboarding decision.
