Master Services Agreement

Document PVR-MSA-NW-2026-0902 | Effective 2 September 2026 | Northwind Industrial Supplies

This Master Services Agreement ("Agreement") is made effective 2 September 2026 between Procurement & Vendor Risk ("Customer") and Northwind Industrial Supplies ("Supplier"). Supplier is the legal name on the vendor register (vendor-01). Notices to Supplier go to contracts@northwind.example.com.

1. Services

Supplier provides direct materials under Category 01 Cloud for the Customer EMEA operations. Supply originates from Supplier operations in Brazil. The scope is the goods and related logistics described in the onboarding file and any statement of work the parties later sign. This Agreement does not appoint Supplier as an exclusive source.

2. Term

The initial term runs through 1 September 2027. It renews for successive one-year terms unless either party gives written notice at least 60 days before the end of the then-current term. Relationship history on the register: 16 years. Status on the file: In Review.

3. Commercial terms

Currency and payment

Fees are in USD. Invoices are due net 30 from a correct invoice. The annual spend baseline recorded for this supplier is USD 28,525,521. That figure is the register baseline for scoring and is not a volume commitment.

Taxes

Fees exclude taxes. Each party bears the taxes the law imposes on it. Supplier states its tax registration on each invoice.

4. Service levels

On-time delivery recorded on the register is 73.4 percent. The composite risk score is 58, which the portal places in the Watch band (Watch starts at 50; Low starts at 75; a higher score is better). If the composite score falls below 50, Supplier submits a written improvement plan within 15 business days. Delivery score on file: 87.

5. Quality and information security

ISO 9001 for the scoped manufacturing and supply process is current on the file. The cyber questionnaire is complete. Scorecard recorded with this Agreement: financial 77, compliance 95, delivery 87, cyber 87. Supplier keeps buyer data only as needed to perform the services, limits access by role, and gives notice of a confirmed security incident within 72 hours.

6. Insurance

Supplier maintains commercial general liability and cargo cover appropriate to direct-materials supply, and names the certificate on the onboarding file. A certificate that expires within 60 days of review is an open condition of Compliance Review. Approval does not proceed until the renewal is on the file or the reviewer records a dated exception.

7. Audit

On reasonable notice, Customer may audit records that relate to fees, delivery performance, insurance, and the security controls in section 5. Audits are limited to once each contract year unless a prior audit found a material gap.

8. Confidentiality and liability

Confidential information is protected by the Mutual NDA dated 18 August 2026 (PVR-NDA-NW-2026-0818), which this Agreement incorporates. Liability of either party is capped at the fees paid or payable under this Agreement in the 12 months before the claim, except for a breach of confidentiality, infringement of intellectual property, or bodily injury caused by negligence. Neither party is liable for indirect or consequential loss.

9. Termination

Either party may terminate for a material breach that stays uncured for 30 days after written notice, or for convenience on 60 days written notice. On exit, Supplier completes in-flight orders the Customer elects to keep and returns or deletes Customer data.

10. Notices and entire agreement

Notices to Supplier: contracts@northwind.example.com. Notices to Customer: the Procurement & Vendor Risk onboarding desk. This Agreement and the Mutual NDA are the entire agreement on their subject. A purchase order may set quantity and delivery date; it does not amend these terms unless both parties sign the change. This PDF is the portal onboarding copy.
